

Freddie Mercury

Lived: September 5 1946-November 24 1991

Zanzibar, Tanzania

Fame: Singer-songwriter, musician, lead singer for Queen

At one point in his life, Mercury owned 10 cats. When he was on tour, he would call home to talk to them!

Freddie Mercury was born with four extra teeth at the back of his mouth. Although he wanted to have it fixed, he never did for fear of ruining his vocals.

“Freddie Mercury has a compelling sense of himself as a spiritual being who is the searcher and the seeker of truth. That said, Freddie’s life is devoted to investigations into the unknown, and finding the answers to the mysteries of life.” -Hans Decoz

Freddie mercury died of AIDS-related pneumonia. He had publically announced that he had AIDS the day before his passing.

Freddie Mercury’s birth name is Farrokh Bulsara. He legally changed his name in 1970, when Queen was formed.
